

WEDNESDAY

Bullodis?

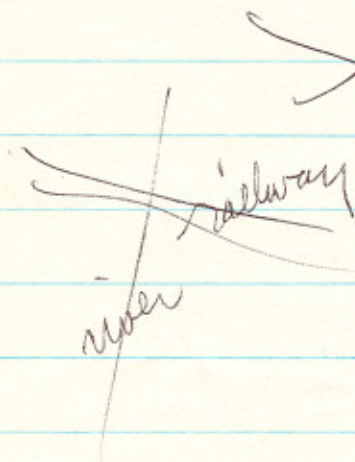

2-11-81 about noon

It is green - heavy growth
Canyon to water much steeper
than barranca (ours)

I think there are acacia, sycamore, pepper
Cottonwood trees - big bush like sumac

there is a fine big one story house
above where rows of trees are
I think they are almost done
blooming because they have leafy

I do not see cattle but there
is a sign with cow on it
near another sign
that is a circle (1) maybe one
the road is narrow

in this side
is big area that
may be hay
