

WEDNESDAY, JANUARY 5, 1983

Jan. 5, '83

approx 11:00 Who's on 1st
— believe is Agai's "Prince"
is near San Benito

in beautiful like summer
weather. Last two days I
have deep longing for Wheyours
— can find them only in
countless pine trees — several
kinds — but while was
getting new beetles out of tank
about noon — thinking of them
"Arroyo Seco" occurs — is it because
heard much in parade? or is it road
to where they are?
