(before forget two orioles were
taking palm date yesterday
afternoon)

up 4:00 — million ants
on left feeder

got pics Augusts past — the
females with 2nd children
are all half moulted like

I wrote about Olga 1st yr.

"her dress was in tatters, her
hairstyle was a mess" wingbar

ID only works in spring — not well
established till
3rd year

still quite dark at 6:00

first orioles came 6:05

wheryous 6:15 — all big ones stuffing

green jay 6:25

big pigeons — scrub jays, doves 6:45

where are our Scott's — was that 2 days
in July all? — Robins finished 2 weeks
earlier this year (con)
