Our last oriole left a week ago (Fri 3) —
the small fuzzy B that got left behind in Sept.
pics watch him grow — moult — into big healthy way
been thinking couple of days it is important to
try to pick up on him — how here, no one
left to guide him — was way to go programmed
into him somehow?

(Juncos are getting near)

only thing I get today is Les word with two LH's
like Larua Canyon Road — you can see
big Simi golf course (Indian Hills) below

he's smart, strong — Super cautious maybe learned
from Robin he flew with last
two weeks here — knows hawk and owl
